

JUMBA FLAVIAN

Profile Summary

I’m a passionate Fullstack Developer specializing in the TALL Stack, with hands-on experience building **eCommerce** platforms, **ERP** systems, **CMS** solutions, and modern frontend applications. My work focuses on crafting scalable, efficient, and user-centered applications — combining clean backend logic in Laravel with elegant and responsive interfaces powered by Tailwind CSS and Alpine.js. I leverage Livewire to build dynamic, real-time features without relying on heavy JavaScript frameworks. Over time, I’ve delivered projects that include: Multi-vendor eCommerce systems with product filtering, order management, and payment integrations. ERP dashboards for process automation and data visualization. Flexible CMS platforms for content-driven businesses. Interactive frontend applications optimized for performance and usability. I’m deeply driven by clean architecture, performance optimization, and building digital solutions that make a real impact.

Education

FULL STACK WEB DEVELOPMENT- Emobilis	Currently
Majors : Front end with HTML, CSS(Bootstrap) and Javascript, backend specialization in python’s framework Django and RESTFUL API development and Mpesa payment integration	
CIPIT's DATA PROTECTION COURSE- Strathmore University	Aug - Oct 2025
Majors : In-depth exploration of data protection laws, focusing on their practical applications in relation to Article 34 of the Kenyan Constitution gained a comprehensive understanding of data rights and the regulatory landscape, equipping them with the knowledge to navigate and implement effective data protection strategies.	
FRONT END WEB DEVELOPMENT - ALX Africa	Mar - Nov 2024
Majors: Soft skills, UI & UX Design, Responsive design, API Integration and Consumption	
SOFTWARE ENGINEERING – PLP Africa	May 2024 - Jan 2025
Majors : Software Development covering Python, Web Technologies, Database Management and Soft Skills, with specialisation in Web Development.	

Skills

Frontend UI Tailwind CSS; Alpine.js; Blade components HTML5/CSS, JavaScript, React	Backend Laravel , PHP; Eloquent ORM; Blade, Filament	Realtime / Reactive Livewire ; Laravel Echo; WebSockets (Pusher)
Database & Data MySQL; Migrations; Eloquent relationships; Query optimization	State, Forms & Validation Livewire validation; Laravel validation rules; Frontend form UX	DevOps & Deployment Docker; Forge; Envoyer; Vapor; Git; CI/CD (GitHub Actions)
Collaboration Git workflows; code reviews; Agile/Scrum	E-commerce & Payments Cashier; Stripe, PayPal integrations; order workflows	APIs & Integrations REST APIs; API resources; Laravel Passport/Sanctum; third-party APIs
Communications & Content Creation Canva, WordPress, Mailchimp, Adobe Suite, Google Analytics, ChatGPT, video editing tools	Auth & Security Laravel Sanctum; Passport; CSRF; encryption; policies & gates	Performance & Caching Redis; Laravel Cache; query optimization; queues (Redis, Beanstalkd)

HOTEL MANAGEMENT SYSTEM – Client Project – Nairobi Kenya

Project(Demo video) [Link\(BE\)](#) [Link\(FE\)](#) August 2025

- Technology Stack: Developed using PHP's Laravel framework and Filament.php for a modern and user-friendly interface.
- API Integration: Implemented RESTful APIs for secure authentication and seamless integration of house listings with the front end.
- Booking Functionality : Designed a comprehensive booking system that streamlines the reservation process for users.
- User Experience: Focused on creating a visually appealing layout that enhances user engagement and simplifies hotel management tasks.

ECOMMERSE API – Personal Project – Nairobi Kenya

Project Link [Link](#) June 2025

- Project Overview: Developed an E-commerce API to facilitate product management for e-commerce platforms.
- Technology Stack: Utilized Laravel to build a scalable and efficient backend system.
- Features: Implemented key functionalities including user authentication, product listings and shopping cart management
- Integration: Designed the API to be easily integrable with various front-end applications and third-party services, enhancing flexibility for developers.

JOB LISTING WEBSITE – Client Project – Nairobi Kenya

Project Link [Link](#) Sept 2025

- Project Overview: Developed a comprehensive job listing website that connects job seekers employers with potential employers, streamlining the recruitment process.
- Technology Stack: Built using the Laravel framework and filament, ensuring a robust and scalable backend architecture.
- Key Features: Implemented functionalities such as job posting, application management, and advanced search filters for job seekers.
- User Experience: Focused on creating an intuitive and responsive design to enhance user engagement and facilitate easy navigation for job seekers.

ERP & OPERATIONS MANAGEMENT SYSTEM – WeTu – Nairobi, Kenya

[Link](#) Jan 2026

Project Overview: Architected and developed a centralized Enterprise Resource Planning (ERP) system to digitize procurement, asset tracking, and inventory management across 16 regional hubs, replacing manual workflows with automated data controls.

Technology Stack: Built using the TALL stack (Tailwind CSS, Alpine.js, Laravel, Livewire) and Filament v4, leveraging a modular architecture to ensure high performance and real-time data synchronization.

Key Features:

- Procurement & Requisition: Implemented a multi-level approval workflow for stock requests, budgeting, and automated purchase order generation.
- Asset Tracking: Developed a comprehensive asset lifecycle management module to monitor equipment distribution and maintenance across diverse geographical locations.
- Business Analytics: Integrated custom Filament dashboards providing real-time visibility into hub performance, stock levels, and expenditure trends.

Mobile App Development (Soccer Vista Scores) – Client Project – Nairobi Kenya

[Link](#) Feb 2026

- Project Overview: Developed a high-performance mobile application providing real-time football scores and data-driven match predictions for a global user base.
- Technology Stack: Built with React Native for cross-platform deployment and Firebase for real-time database management, authentication, and cloud messaging.
- Key Features: Integrated Firestore for scalable data storage, implemented secure user authentication, and optimized the app for high-traffic match days using background synchronization.
- User Experience: Focused on a "dark-mode" first aesthetic with interactive animations, ensuring low-latency updates and a

Work Experience

FULL STACK DEVELOPER – Osen Concepts – Nairobi Kenya (Hybrid)

May 2025 - Present

- Developed and maintained web applications using the Laravel framework.
- Implemented user interfaces and features with Filament for streamlined admin dashboards.
- Collaborated with cross-functional teams to define, design, and ship new features.
- Optimized application performance and ensured high responsiveness to front-end requests.

Skills: *React js · Laravel · Filament php · UI & UX*

FRONT END DEVELOPMENT – Triangle Health Care Consulting Inc – North Carolina (USA) - Remote

November 2023 - 2024 MAY

- Interpret, synthesize, design, and modify reports.
- Collect, trend, and provide analysis for nursing and infection control measures.
- Maintain, evaluate, and improve Nursing Scorecards and dissemination of quality information.
- Managed and customized their wordpress website

Skills: *Advanced Microsoft Excel · Wordpress · UI/UX*

FRONT END WEB DEVELOPER – Sand Technologies – New York(USA) - Remote

September 2024 - June 2025

- Hands-On Development: Gained practical experience in web development by delivering multiple responsive front-end features using HTML, CSS, React.js, and JavaScript.
- Collaboration and Teamwork: Collaborated effectively with back-end engineers in an agile environment, ensuring seamless API integration and enhancing the overall user experience through teamwork.
- Code Review and Best Practices: Participated in code reviews and sprint planning sessions, which provided valuable exposure to professional software development practices and modern front-end architecture patterns.
- Performance Optimization: Successfully reduced page load times through code optimization techniques and implemented best practices in modern web development, enhancing overall application performance.

Skills:*Web design · Web design · Front End development · React js*

VOLUNTEERING

FOOTPRINTS OF HOPE - Community Mobilizer and Trainer - Siaya and Busia County (Part - Time)
